

BRYAN AYLLON

DESIGNER. DEVELOPER. CREATIVE.

EXPERIENCE

Talent Book Studios LLC

October 2020 - Present

- Played a key role in the development and maintenance of Talent Book's flagship products in Swift.
- Collaborated closely with the Design Team to ensure adherence to iOS App guidelines and promptly resolved any issues.
- Incorporated Firebase features such as Authentication, Functions, WidgetKit, VisionOS, and SwiftUI into the Talent Book App.
- Conducted TestFlight and Monthly sessions with focus groups consisting of Fashion Models, Modeling Agencies, and Clients to identify and address any bug issues or usability concerns.
- Successfully uploaded and maintained the Talent Book App on the App Store, coordinating with Apple during the App Store Review process.

Wyze Energy Beverages

July 2021 - November 2021

- Contributed to the development of a customer-facing app for purchasing, reviewing, and browsing natural beverage products.
- Created and developed internal apps for employees, streamlining shipping logistics and product inventory using Swift.
- Oversaw the uploading and maintenance of the Wyze iOS App on the App Store, liaising with Apple during the review process.
- Integrated Firebase features, including Authentication and Functions, and utilized Stripe's Payment System for invoicing and billing.

App Your Brand

September 2019 - May 2021

- Designed the User Experience and Interface for the iOS App, leveraging Sketch and Tesla Vehicles to establish Design Guidelines.
- Collaborated with Tesla Owners to gather feedback on usability and address any potential crashes during development.
- Developed the Subscription Screen and View All Videos Screen using Swift and Core Data.
- Created the website page using HTML/CSS/Javascript.
- Implemented Core Data to enable local data storage on users' devices.
- Demonstrated the app at Tesla Locations during the launch, catering to daily drivers.

Ahuevo Studios

July 2019 - September 2020

- Developed the first app on the App Store that decoded Tesla's Supercharger API.
- Utilized Swift and Core Data to implement the app and enable saving of users' favorite locations.
- Implemented a TableView to present information for improved readability.
